Abseil (Training & Gear)

Tour Details

The Maletsunyane Abseil is the longest commercially operated single-drop abseil in the world, operated by Semonkong Lodge, Lesotho!

Set on the edge of the spectacular Maletsunyane Falls, this abseil descends 204m non-stop to the bottom of the gorge where few people dare to tread. As you stand on the edge of the falls you are exposed to all the elements of the gorge and Mother Nature herself. The abseil itself is an extremely exposed straight drop where at times you are suspended in mid-air with the spray of the waterfall upon you and the birds of the cliffs flying around you. This is abseiling at its best and most exciting. The abseiling includes training in and around the Lodge, on much more subdued cliffs of only 25m. Here our qualified guides help you to get familiar with the equipment and the techniques used on this extreme abseil. The following morning, while the air is still fresh, you take a 4X4 drive out to the abseil site where the real fun begins. This is not for the faint-hearted.

Accommodation is provided in comfortable stone and thatch rondavels and includes breakfast and dinner daily.

Group size is limited to 12 people so book early to secure your spot.
